

Experis Cloud Services

- | Based on HP CloudSystem Helion
- | Easy Migration to Private, Hybrid, or Public Cloud Environments

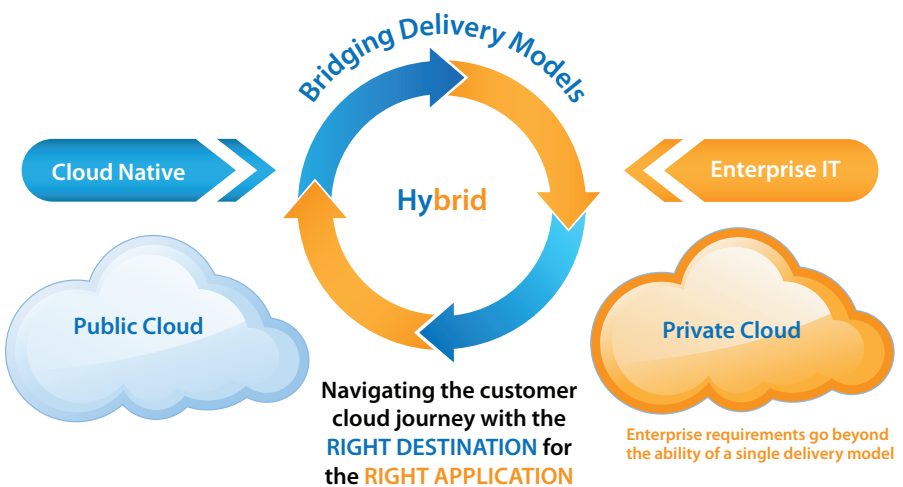

Experis Technology Group and Experis Data Centers have teamed up to offer unique Cloud services. Experis, an HP Enterprise Elite Storage, Convergent Blade Solutions, and CloudAgile Partner, is providing private and hybrid cloud systems solutions in its Middletown (Va.) DR Data Center.

Experis, as a HP CloudAgile Select Partner, has exclusive skills and systems designed to make managing cloud solutions easy and vendor independent. Utilizing the HP Helion Cloud Solutions system, Experis can provision and quickly turn up cloud platforms of any type and capabilities for customers to use on an as needed basis or as part of a full time service offering. The Helion Cloud Solutions are built around transparent, open systems and services providing a common management platform and policy that supports multiple vendors hypervisors. This helps customers avoid vendor lock in and greatly enhances flexibility and speed to innovation. Helion provides unified management, enterprise grade security and a comprehensive portfolio of products, solutions, and services for Hybrid IT environments. This helps customers bridge the transition from private to cloud environments (public, private and hybrid) while maintaining complete control. As an elite HP Services Partner, Experis can engineer solutions to your business problems.

Cloud Systems manage the design, configuration provisioning and management of Windows and Linux services in a cloud environment. This brings the transition from private to hybrid or public to a new level of capability and service offering:

- Enterprise Grade Services—99.99% or better SLA
- Rapid feature evolution without vendor lock-in
- Ensure no vendor lock-in and rapid feature evolution
- Better manage and migrate workloads between private, public, and managed clouds
- Popular Hypervisors and OpenStack technology
- Reduced costs, improved utilization, pay-as-you-go and elastic infrastructure built around HP Blade Systems and 3PAR Tier 1 Storage
- Secure and Highly available.
